

PRESS RELEASE
No. 29 of February 6, 2013

Average earnings^{*)} in December 2012

For correct interpretation of results, please consult the Methodological notes from page 2 of the Press release

In December 2012, the average gross nominal earnings were 2343 lei, by 7.8 % higher than the one registered in November.

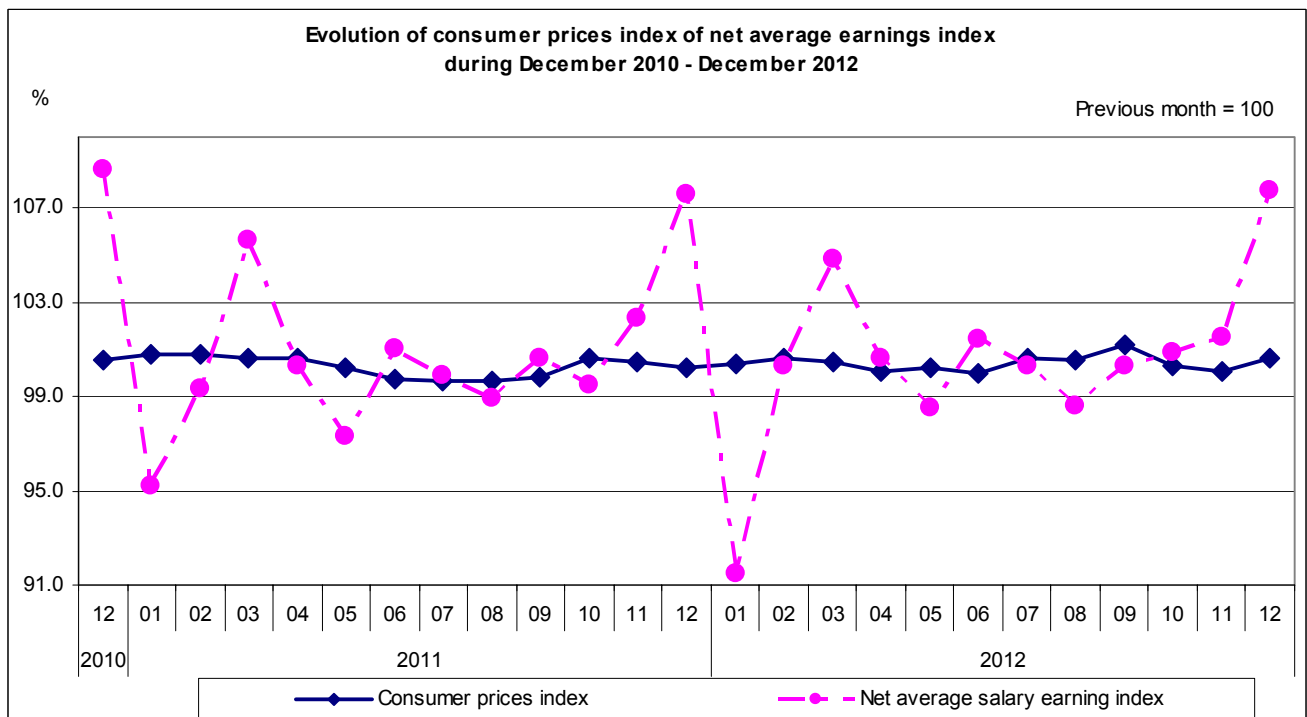

The average net nominal earnings were 1697 lei, increasing as against the previous month with 122 lei (7.7%).

The highest values of the average net nominal earnings were recorded in financial intermediation (4576 lei), while the lowest in accommodation and food service activities (904 lei).

Earnings in relation with the evolution of consumer prices

The real earnings index for December 2012 as against previous month, calculated as the ratio between the net nominal earnings index and the consumer prices index, was 107.1%.

As compared to October 1990, the real earnings index was 129.8%, by 8.6 percentage points higher than the one recorded in November 2012.

Fluctuations in earnings were recorded during the year, mainly determined by granting annual premiums and holiday bonuses (December, March/April). These are influencing the increases or decreases depending on the period they are granted, finally leading to smoothing the fluctuations in monthly earnings at the level of the whole year.

^{*)} Please see Methodological notes from item 4. Concepts and definitions.

December 2012 as compared to November 2012

In December 2012, as against the previous month, **the level of the average net earnings registered increases in the majority of activities belonging to the economic sector¹**, due to granting of occasional bonuses (including holiday and annually bonuses), amounts from other funds (including gifts and meal tickets). Also, the average net earnings in December increased by comparison with the previous month as the production achievements or the receipts level were higher (depending on contracts), as well as for ceasing of staff contracts with low earnings.

The most significant increases in the average net earnings have been recorded as follows:

- Between 20.0% and 26.5% in mining of coal and lignite, mining of metal ores, manufacture of basic pharmaceutical products and pharmaceutical preparations, financial service activities (except insurance and pension funding), printing and reproduction of recorded media, electricity, gas, steam and air conditioning supply;
- Between 16.5% and 20.0% in manufacture of computer, electronic and optical products, manufacture of basic chemicals (including fertilisers and nitrogen compounds, plastics and synthetic rubber in primary forms), warehousing and support activities for transportation, manufacture of other non-metallic mineral products, forestry and logging (including fishing and aquaculture), manufacture of coke and refined petroleum products.
- Between 11.5% and 15.0% in manufacture of basic metals, manufacture of beverages, sewerage, telecommunications, manufacture of tobacco products, real estate activities, insurance, reinsurance and pension funding (except compulsory social security).

Decreases of the average net earnings as compared to the previous month were caused by the occasional bonuses granted in November, production un-achievements or lower receipts (depending on contracts).

The most significant decreases of the average net earnings have been recorded in air transport (-2.0%), respectively in manufacture of machinery and equipment n.e.c. (-1.8%).

In the **budgetary sector²** the **increases of the average net earnings** as against November were the result of entering in force of the Emergency Ordinance provisions No. 19/2012³. Thus, the average net earnings increased in December as against November 2012 by 7.7% in health and social assistance, by 7.4% in public administration, respectively by 2.2% in education.

In education **the average net earnings** was also influenced by the amounts reduction representing the hourly payments of teaching staff, as a result of the winter holiday.

December 2012 as compared to December 2011

As compared to December of the previous year, the average net nominal earnings increased by 5.8%. The real earnings index in relation with the same period of previous year was 100.8%.

Methodological notes

1. Monthly data on earnings and number of employees are obtained from a sample statistical survey. For sizing the sample getting estimates of the main surveyed characteristics was considered, affected by errors in the limit of +/-3% and guaranteed with a probability of 95%. Since January 2012, the sample includes 22000 economic and social units. Budgetary units are exhaustively surveyed, except for the units of local public administration for which data at level of local communal councils are collected based on a sample representative at county level (about 770 units).

For economic sector, the survey covers the units with four employees and over, representing 90.59% of total employees in this sector.

The objective of monthly statistical survey on earnings is to evaluate short term trends of monthly and hourly average earnings per total economy and by activity sector.

2. Data obtained from monthly statistical survey on earnings and number of employees are **aggregated by homogenous activity of the units**, meaning that public administration **does not include** all the secondary activities developed by central and local public administration, such as:

¹ Excluding activities of public administration, education, health and social assistance

² see Methodological notes from point 3 regarding „ budgetary sector”.

³ Emergency Ordinance No. 19/2012 for the approval of some measures in order to recover the budgetary cuts

- social assistance,
- cultural, sport and recreation activities,
- landscape and services for buildings,
- agriculture,
- water distribution, sanitation, waste management, decontamination activities,
- construction,
- transport and storage,
- production and supply of electric and thermal energy, gas, hot water and air conditioning,
- renting and sub-renting real estate goods etc.

Information for secondary activities are included in the corresponding economic activities according to CANE Rev.2 .

3. Information regarding „**budgetary sector**” should be used carefully, because data refer to statistics from economic activities (aggregated by homogenous activity) **according to CANE Rev.2.** of public administration, education and health and social assistance (including private sector for education – about 3%, respectively health and social assistance - about 7%), excluding armed forces and similar (Ministry of National Defence, Ministry of Administration and Interior, Romanian Intelligence Service etc.).

These statistics do not take into account the financing type, their purpose being to provide information by economic activity according to CANE Rev.2.

Information corresponding to the financing type are administered by the Ministry of Public Finance, according to the stipulations of Urgency Government Ordinance no. 48/2005, with later completions and modifications.

4. Concepts and definitions

Gross nominal earnings comprise salaries, respectively rights in cash and in kind for employees for the work done (including for overtime) according to salary type, increases and indemnities as per cent of salary or in fixed amounts, other additions to salary according to the law, amounts paid for time not worked (indemnities for rest and study leaves, holidays and days off, amounts paid from salary fund for medical leaves), premiums, holiday bonuses and other amounts paid from salary fund according to normative documents and collective labour contracts, amounts paid from net profit and other funds (including equivalent value of meal tickets).

Net nominal earnings are obtained subtracting from gross nominal earnings the tax, contribution of employees for health social insurance, individual contribution of state social insurance and employee contribution to unemployment insurance budget.

Average monthly earnings represent the ratio between amount paid to employees by economic units in the reference month, irrespective of due period and average number of employees. Average number of employees represents an arithmetic mean calculated based on daily number of employees in the reference month. Number of employees taken into calculation includes only persons who were paid for that month. The employees in unpaid holiday, on strike, detached to work abroad and those whose labour contract/agreement was suspended are not taken into account.

Gross nominal earnings index is calculated as ratio between gross nominal earnings of current month and that of reference month, expressed in per cent.

Net nominal earnings index is calculated as ratio between net nominal earnings of current month and that of reference month expressed in per cent.

Real earnings index is calculated as ratio between net nominal earnings index and general consumer price index expressed in per cent.

Additional information can be obtained from the publication Monthly Statistical Bulletin no.12/2012.

Next press release will be issued on Thursday, March 7, 2013.
