

## PRESS RELEASE

No. 53 of March 7, 2013

### Average earnings<sup>\*)</sup> in January 2013

*For correct interpretation of results, please consult the Methodological notes from page 2 of the Press release*

In January 2013, the average gross nominal earnings were 2138 lei, by 8.7% lower than the one registered in December 2012.

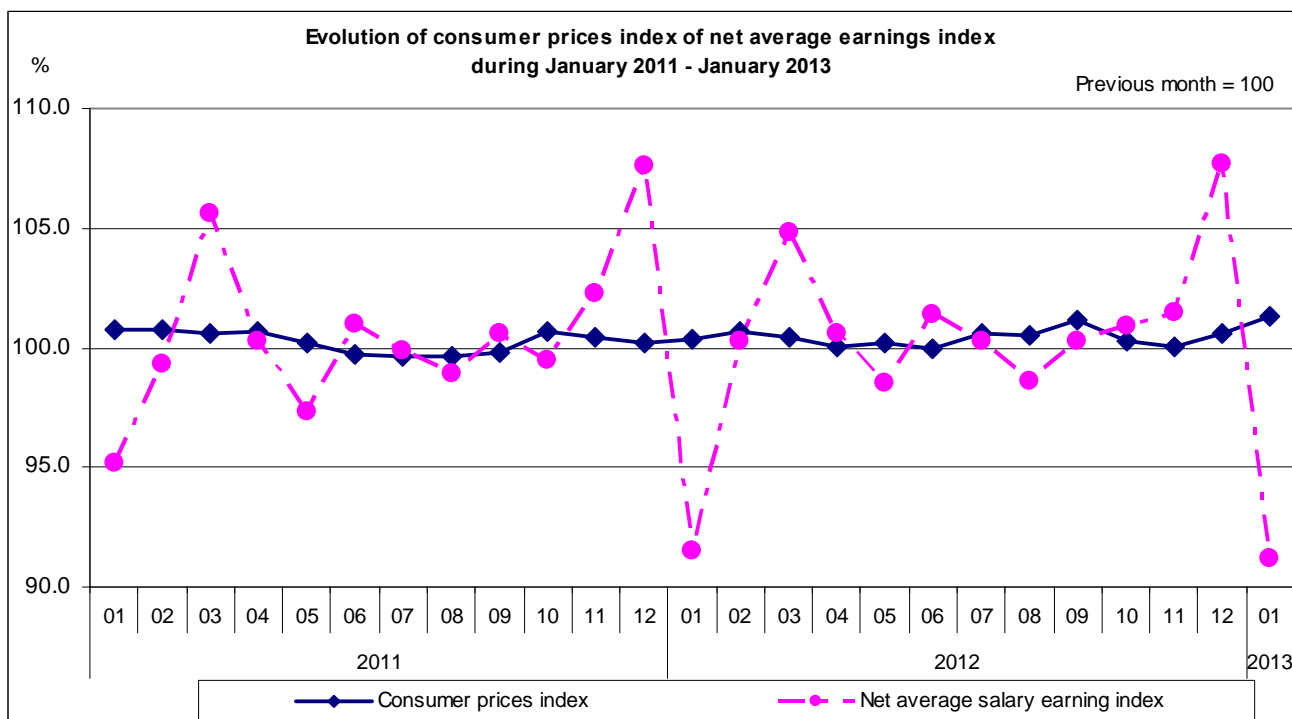

The average net nominal earnings were 1548 lei, decreasing as against the previous month with 149 lei (8.8%).

The highest values of the average net nominal earnings were recorded in air transport (3799 lei), while the lowest in accommodation and food service activities (840 lei).

#### Earnings in relation with the evolution of consumer prices

The real earnings index for January 2013 as against previous month, calculated as the ratio between the net nominal earnings index and the consumer prices index, was 90.0%.

As compared to October 1990, the real earnings index was 116.8%, by 13.0 percentage points lower than the one recorded in December 2012.

Fluctuations in earnings were recorded during the year, mainly determined by granting annual premiums and holiday bonuses (December, March/April). These are influencing the increases or decreases depending on the period they are granted, finally leading to smoothing the fluctuations in monthly earnings at the level of the whole year.

<sup>\*)</sup> Please see Methodological notes from item 4. Concepts and definitions.

## January 2013 as compared to December 2012

In January 2013, as against the previous month, **the level of the average net earnings registered decreases in the majority of activities belonging to the economic sector<sup>1</sup>**, due to granting in December of occasional bonuses (including holiday and annually bonuses), amounts from other funds (including gifts and meal tickets). Also, the average net earnings in January decreased by comparison with the previous month due to lower production achievements or the receipts level (depending on contracts), as well as staff hiring with low earnings.

**The most significant decreases in the average net earnings** have been recorded as follows:

- Between 20.0% and 26.5% in mining of metal ores, publishing activities, forestry and logging (including fishing and aquaculture), manufacture of wood and of products of wood and cork (except furniture; manufacture of articles of straw and plaiting materials), telecommunications.
- Between 17.0% and 20.0% in manufacture of basic pharmaceutical products and pharmaceutical preparations, mining of coal and lignite, electricity, gas, steam and air conditioning supply, financial service activities (except insurance and pension funding), manufacture of computer, electronic and optical products, manufacture of coke and refined petroleum products, printing and reproduction of recorded media.
- Between 13.0% and 15.5% in manufacture of beverages, manufacture of basic chemicals, fertilisers and nitrogen compounds, plastics and synthetic rubber in primary forms, activities auxiliary to financial services and insurance activities, water transport, manufacture of electrical equipment, warehousing and support activities for transportation, computer programming, consultancy and related activities (including information service activities), scientific research and development, manufacture of basic metals.

**Slight increases of the average net earnings** as compared to the previous month were registered in the economic sector in other mining and quarrying<sup>2</sup> (2.1%) and were due to the unpaid leaves of the staff which earn low wages or to higher production achievements.

In the **budgetary sector<sup>3</sup>** were registered **decreases of the average net earnings** as against the previous month in health and social assistance (-1.4%) and education (-1.3%), mainly due to granting bonuses in December to the employees belonging to the private sector.

**Slight increases of the average net earnings** as against December 2012 were registered in public administration (0.7%) due to promotions.

## January 2013 as compared to January 2012

As compared to January of the previous year, the average net nominal earnings increased by 5.5%. The real earnings index in relation with the same period of previous year was 99.6%.

### Methodological notes

1. Monthly data on earnings and number of employees are obtained from a sample statistical survey. For sizing the sample getting estimates of the main surveyed characteristics was considered, affected by errors in the limit of +/-3% and guaranteed with a probability of 95%. Since January 2013, the sample includes 21000 economic and social units. Budgetary units are exhaustively surveyed, except for the units of local public administration for which data at level of local communal councils are collected based on a sample representative at county level (about 770 units).

For economic sector, the survey covers the units with four employees and over, representing 90.39% of total employees in this sector.

**The objective** of monthly statistical survey on earnings is to evaluate short term trends of monthly and hourly average earnings per total economy and by activity sector.

2. Data obtained from monthly statistical survey on earnings and number of employees are **aggregated by homogenous activity of the units**, meaning that public administration **does not include** all the secondary activities developed by central and local public administration, such as:

- social assistance,
- cultural, sport and recreation activities,

---

<sup>1</sup> Excluding activities of public administration, education, health and social assistance

<sup>2</sup> Comprises the activities such as quarrying of stone, sand and clay, mining of chemical and fertiliser minerals, extraction of peat, extraction of salt a.s.o.

<sup>3</sup> see Methodological notes from point 3 regarding „ budgetary sector“.

- landscape and services for buildings,
- agriculture,
- water distribution, sanitation, waste management, decontamination activities,
- construction,
- transport and storage,
- production and supply of electric and thermal energy, gas, hot water and air conditioning,
- renting and sub-renting real estate goods etc.

Information for secondary activities are included in the corresponding economic activities according to CANE Rev.2 .

3. Information regarding „**budgetary sector**” should be used carefully, because data refer to statistics from economic activities (aggregated by homogenous activity) **according to CANE Rev.2.** of public administration, education and health and social assistance (including private sector for education – about 3%, respectively health and social assistance - about 7%), excluding armed forces and similar (Ministry of National Defence, Ministry of Administration and Interior, Romanian Intelligence Service etc.).

These statistics do not take into account the financing type, their purpose being to provide information by economic activity according to CANE Rev.2.

Information corresponding to the financing type are administered by the Ministry of Public Finance, according to the stipulations of Urgency Government Ordinance no. 48/2005, with later completions and modifications.

#### 4. Concepts and definitions

**Gross nominal earnings** comprise salaries, respectively rights in cash and in kind for employees for the work done (including for overtime) according to salary type, increases and indemnities as per cent of salary or in fixed amounts, other additions to salary according to the law, amounts paid for time not worked (indemnities for rest and study leaves, holidays and days off, amounts paid from salary fund for medical leaves), premiums, holiday bonuses and other amounts paid from salary fund according to normative documents and collective labour contracts, amounts paid from net profit and other funds (including equivalent value of meal tickets).

**Net nominal earnings** are obtained subtracting from gross nominal earnings the tax, contribution of employees for health social insurance, individual contribution of state social insurance and employee contribution to unemployment insurance budget.

**Average monthly earnings** represent the ratio between amount paid to employees by economic units in the reference month, irrespective of due period and average number of employees. Average number of employees represents an arithmetic mean calculated based on daily number of employees in the reference month. Number of employees taken into calculation includes only persons who were paid for that month. The employees in unpaid holiday, on strike, detached to work abroad and those whose labour contract/agreement was suspended are not taken into account.

**Gross nominal earnings index** is calculated as ratio between gross nominal earnings of current month and that of reference month, expressed in per cent.

**Net nominal earnings index** is calculated as ratio between net nominal earnings of current month and that of reference month expressed in per cent.

**Real earnings index** is calculated as ratio between net nominal earnings index and general consumer price index expressed in per cent.

*Additional information can be obtained from the publication Monthly Statistical Bulletin no.1/2013.*

Next press release will be issued on Thursday, April 4, 2013.
