Methodological explanations

1. **Data source**: the annual statistical survey "Water Supply in 2016"
2. **Coverage**: the statistical survey covers all the units having water collection, treatment and supply (NACE Rev. 2 division code: 36) as their main economic activity, the local public administration units (NACE Rev. 2 class code: 8411) that supplied water and the economic operators with water abstraction licences for flow rates higher than 100l/s.
