- Romania is situated in the geographical centre of Europe (south-east of Central Europe), in the north of the Balkan Peninsula, at half the distance between the Atlantic Coast and the Urals, inside and outside the Carpathians Arch, on the lower course of the Danube (1075 km), and is bathed by the Black Sea.
- The geometrical centre, of the country is placed at the crossing of the 45°N parallel with the 25°E meridian (100 km N-W of the country's capital, Bucharest).

- **Total area = 238397 km².**

The total area of Romania was updated by the National Agency for Cadastre and Land Registration according to the Law on cadastre and land registration No 7/1996, with subsequent amendments.

- **Romanian total borders** = 3150 km.
- **Neighbours:** Bulgaria, Republic of Moldova, Serbia, Ukraine and Hungary.
- **The Romanian coast** of the Black Sea stretches along 245 km, between the Musura stream (at the border with Ukraine) and the Vama Veche locality (at the border with Bulgaria).

Administrative organisation of the Romanian territory on December 31, 2018

Number of counties	42¹⁾
Number of towns and municipalities	320
of which: municipalities	103
Number of communes	2861
Number of villages	12957

¹⁾ Including Bucharest Municipality.

ROMANIA'S RELIEF

It consists of three major levels, namely: the highest one in the Carpathians, the middle one which corresponds to the Sub-Carpathians, to the hills and to the plateaus, and the lowest one in the plains, the meadows and the Danube Delta. The main features of the relief units are proportionality (31% mountains, 36% hills and plateaus, 33% plains and meadows) and the concentric display of the major relief levels.

Major mountain peaks

Name of peak	Name of massif	County	Height (m)
Moldoveanu	Făgăraș	Argeș	2544
Negoiu	Făgăraș	Argeș, Brașov, Sibiu	2535
Parângu Mare	Parâng	Gorj, Hunedoara	2519
Peleaga	Retezat	Hunedoara	2509
Omu	Bucegi	Prahova, Brașov, Dâmbovița	2505

Source: *Institute of Geography.*

- Romanian **running waters** are radially displayed, most of them having their source in the Carpathians, and flow into the Danube river, which marks the southern border on a 1075 km length and flows into the Black Sea.

Major rivers

River name	Length of the river (km)	Basin area (km ²)
Danube	1075	33250 ¹⁾
Mureș	761	27890
Prut	742	10990
Olt	615	24050
Siret	559	42890

¹⁾ *Excluding the tributaries which form the first degree basins.*

- Romania's **useful mineral resources** are diverse: crude oil, natural gas, coal, mainly coked pitcoal, brown coal and lignite, ferrous and non-ferrous ores, gold and silver deposits, bauxite, large reserves of salt, as well as numerous non-metalliferous resources.

A special category of subsoil resources are the over 2000 mineral water springs fit for consumption and medical treatment.

POPULATION

- 19530631 inhabitants, on January 1st, 2018 (usually resident population);
- Density of the usually resident population: 81.9 inhabitants / km², on January 1st, 2018.

CAPITAL: Bucharest Municipality (2121794 inhabitants, permanent resident population on July 1st, 2018), divided into six administrative sectors. Mentioned for the first time in documents on 20.IX.1459, as residence of Vlad Țepeș.

It becomes the capital of the Romanian Country (Țara Românească) in the second half of the 17th century and the capital of Romania in 1862, being the most important political, economic, cultural and scientific centre of the country.

MAIN CITIES: Bucharest, Iași, Timișoara, Cluj-Napoca, Constanța, Craiova, Galați, Brașov, Ploiești, Oradea.

The town situated at the highest average altitude is Predeal (Brașov county) = 1060 m.

The town situated at the lowest average altitude is Sulina (Tulcea county) = 4 m.

MAIN HARBOURS:

- at the Black Sea: Constanța, Mangalia;
- at the Danube: Moldova Nouă, Orșova, Drobeta-Turnu Severin, Calafat, Corabia, Turnu Măgurele, Zimnicea, Giurgiu, Oltenița, Călărași, Cernavodă, Hârșova, Măcin, Brăila, Galați, Tulcea, Sulina.

MAIN AIRPORTS: Bucharest ("Henri Coandă"-Otopeni and "Aurel Vlaicu"-Băneasa), Constanța („Mihail Kogălniceanu”), Timișoara („Traian Vuia”), Cluj-Napoca, Iași, Craiova, Arad, Bacău, Baia Mare, Oradea, Satu Mare, Sibiu, Târgu Mureș, Suceava, Tulcea.

OFFICIAL LANGUAGE: Romanian.

ROMANIA'S NATIONAL DAY: December 1.

ROMANIA'S FLAG: Is three coloured, the colours being placed vertically in the following order from the flagpole: blue, yellow, red.

GOVERNMENT FORM IN ROMANIA:

- Republic, according to the Constitution adopted in 1991, amended and republished in 2003 (Official Journal No 767/October 31, 2003);
- Legislative power: a bicameral Parliament (the Chamber of Deputies and the Senate);
- Executive power: a Government led by a Prime Minister appointed by the country's President;
- The President of the country is elected based on general election results by universal vote for a 5-year mandate.

NATIONAL CURRENCY: leu, with "ban" as subdivision.

The exchange rate is set on the interbank currency market on a daily basis; the reference currency is the euro. In 2018, the average exchange rate leu / euro was 4.6535.

Usually resident population by sex, age group and area, on July 1st

1) According to the NIS revision calendar, revised data.

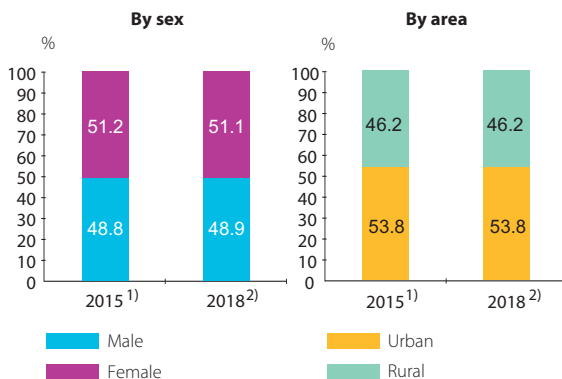

2) On January 1st.

On January 1st, 2018, Romania's usually resident population was 19530.6 thousand inhabitants, of which 10.0 million women (51.1%). The negative values of the natural increase, combined with those of international migration balance, entailed a diminution of the usually resident population during July 1st, 2015 - January 1st, 2018 with 291.6 thousand persons. The age structure of the usually resident population bears the specific imprint of the demographic ageing process, marked primarily by declining birth rates, which has determined the fall in the share of young population (0-14 years) and the absolute and relative increase in the share of older people (60 years and over). On January 1st, 2018 compared to July 1st, 2015, a slight increase in the share of young people (0-14 years) was noticed, from 15.5% to 15.6%, while the share of elderly population (aged 60 and over) considerably increased from 23.9% to 25.1%.

The adult usually resident population (15-59 years) on January 1st, 2018 represents 59.3% of the total, decreasing with 426 thousand persons as against July 1st, 2015. Among the adult population, the share of the age groups 40-44 years, 45-49 years, 50-54 years increased, while the share of the age groups 15-19 years, 20-24 years, 25-29 years, 35-39 years and 55-59 years decreased.

On January 1st, 2018, the usually resident population in urban area was 10.5 million persons, accounting for 53.8% of the country's population.

Rural	9706971	9708759	9695349	9670957

¹⁾ According to the NIS revision calendar, revised data.

²⁾ Provisional data.

On July 1st, 2018, the Romania's permanent resident population was 22177,6 thousand people, a decrease with 109 thousand people compared to July 1st, 2015; this decrease was mainly due to the negative natural increase of the population.

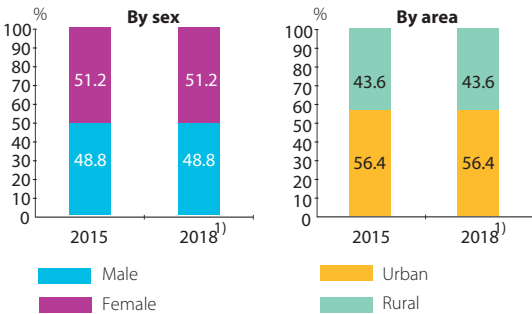

On July 1st, 2018 compared to July 1st, 2015, the share of young people (0-14 years) fell from 14.9% to 14.7% and the share of the elderly population (aged 60 and over) increased from 21.7% to 23.0%. The adult population (15-59 years) accounts for 62.3% of total, decreasing with 290.2 thousand persons from July 1st, 2015.

On July 1st, 2018, the permanent resident population in urban area was 12.5 million persons, accounting for 56.4% of the country's population.

Note: Permanent resident population on **July 1st, 2018** - Provisional data.

Usually resident population on **July 1st, 2015** - Revised data.

Permanent resident population, on July 1st

¹⁾ Provisional data.

The average age of the population, on July 1st

years

	2015 ¹⁾	2016	2017	2018
The average age of the usually resident population	41.4	41.6	41.8	41.9 ²⁾
The average age of the permanent resident population of Romania	40.7	41.0	41.2	41.4 ³⁾

¹⁾ According to the NIS revision calendar, revised data. ²⁾ On January 1st.

³⁾ Provisional data.

The average age of the usually resident population of the country grew from 41.4 years (July 1st, 2015) to 41.9 years (January 1st, 2018), average age characterising countries with "adult" population. Female population, with an average age of 43.5 years was on January 1st, 2018 older than male population by 3.3 years. The average age of the permanent resident population increased from 40.7 years (July 1st, 2015) to 41.4 years (July 1st, 2018). Female population, with an average age of 42.9 years was on July 1st, 2018 older than male population by 3.0 years.

Evolution of live-births, mortality, marriages, divorces and natural increase

	2015	2016 ¹⁾	2017 ¹⁾	2018
Vital statistics (absolute data)

Divorces	1.4	1.4	1.4	1.4 ⁴⁾

Note: Only live-births whose mothers' usual residences were in Romania and whose births were recorded by the registry courts of Romania are included; as for deaths under 1 year, only the deaths of persons whose usual residences were in Romania and whose deaths were recorded by the registry courts of Romania are included. For birth and mortality rates from the 2015-2017 period, the usually resident population on July 1st of each year was used and for 2018 year, the usually resident population on January 1st was used, populations estimated under conditions of comparability with the final results of the Population and Housing Census 2011. For marriage and divorce rates the permanent resident population on July 1st was used.

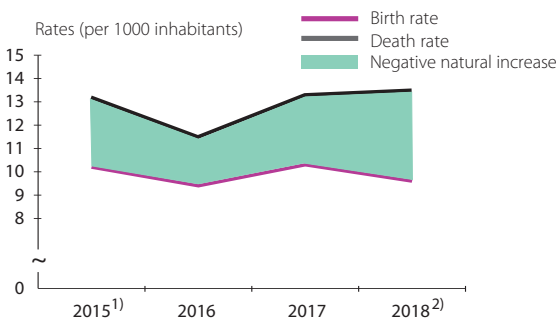

1) Final data. 2) According to the NIS revision calendar, revised data.

3) Semi-final data. 4) Provisional data.

5) Infant mortality rate is calculated as the ratio of the number of deaths of persons under 1 year, who had the usual residences in Romania, to 1000 live-births whose to residences were in Romania.

Source: NIS - Statistical demographic surveys.

Birth rate, death rate and natural increase

Notă: Only live-births whose mothers' usual residences were in Romania and whose births were recorded by the registry courts of Romania are included; as for deaths under 1 year, only the deaths of persons whose usual residences were in Romania and whose deaths were recorded by the registry courts of Romania are included. For birth and mortality rates from the 2015-2017 period, the usually resident population on July 1st of each year was used and for 2018 year, the usually resident population on January 1st was used, populations estimated under conditions of comparability with the final results of the Population and Housing Census 2011.

1) According to the NIS revision calendar, revised data.

2) Provisional data.

Source: NIS - Statistical demographic surveys.

The birth rate, the first component of the vital statistics showed for 2018 a decrease compared to the previous year and compared to 2015. Under the conditions where, on the short and medium term, mortality is not expected to contribute significantly to reducing the demographic decline in Romania, the birth rate remains the only one component on which it could be acted with efficient outcomes.

In 2018¹⁾, the number of live births with usual residence in Romania was 187.8 thousand persons, decreasing with 14.3 thousands compared to 2017 and with 14.2 thousand persons compared to 2015²⁾.

Mortality - as the second component of vital statistics - remained high in Romania. The significant increase in the level of this component should be taken into account for the demographic perspectives of Romania.

263.1 thousand persons with usual residence in Romania have died in 2018¹⁾, 1.7 thousand people more than in 2017 and 0.7 thousand people more than in 2015²⁾. The number of deaths under 1 year for children with usual residence in Romania, registered in 2018¹⁾, was 1214, with 150 fewer deaths compared to 2017 and with 293 less in comparison with 2015²⁾.

Note: For the 2015-2018 period, only live-births whose mothers' usual residences were in Romania and whose births were recorded by the registry courts of Romania are included; as for deaths under 1 year, only the deaths of persons whose usual residences were in Romania and whose deaths were recorded by the registry courts of Romania are included.

1) Semi-final data.

2) According to the NIS revision calendar, revised data.

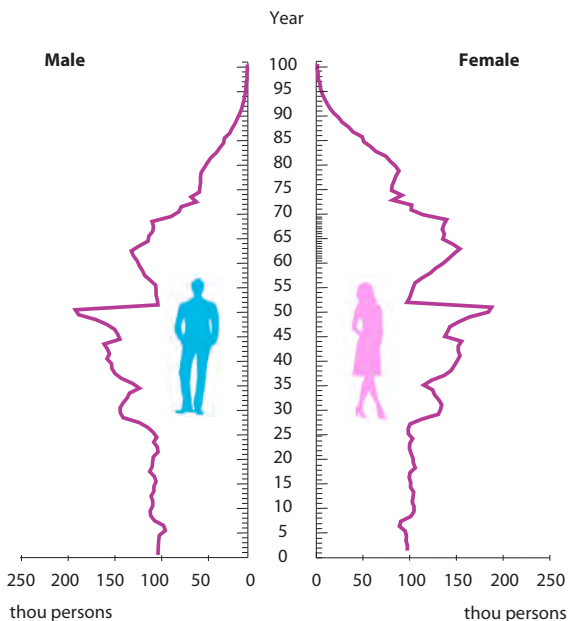

Evolution of marriages and divorces

143.3 thousand marriages were concluded in 2018. Compared to 2017, the number of marriages increased with 0.7 thousands, while compared to 2015 there were 17.8 thousands more.

In 2018, the number of divorces was 30.9 thousands, decreasing with 290 compared to 2017 and with 670 compared to 2015.

Usually resident population by age and sex,
on January 1st, 2018

The ages pyramid reflects in the most accurate way the generations' chronicle, highlighting the disproportions in the population structure by age and sex. The decreasing number of young population further narrowed the ages pyramid base. The demographic and economic effects of this evolution will be felt over time and will entail changes in the various sub-populations (school population, population of childbearing age, working age population).

Top ten towns in the country by number of inhabitants
with permanent residence in Romania, on July 1st, 2018

Current number	Town ¹⁾	Number of inhabitants
1.	Bucharest	2121794

10.	Oradea	221398

¹⁾ Municipality (county residence).

On July 1st, 2018, 12.5 million people had their permanent residence in urban area, representing more than half of the country's population.

Of the 320 towns and cities, 85.6% had a population of less than 50 thousand inhabitants, representing 18.0% of the country's population and 32.0% of the urban population. Large cities (over 100000 inhabitants) hold 31.5% of the country's population and 55.8% of the urban population.

In rural area, on July 1st, 2018¹⁾, there were 9.7 million persons, representing 43.6% of the country's population. The communes with populations between 1000 and 5000 inhabitants represented 79.6% of the total number of communes.

Note: Provisional data on 2018 will be available in September 2019.

The balance of permanent international migration was positive, the number of immigrants being 2.2 times higher than the number of emigrants. In 2017, the balance of international migration by change of usual residence was negative, the number of emigrants exceeding the number of immigrants with 64 thousands people.

In 2017, most emigrants were male, representing 50.7% of all emigrants, as opposed to 2016 (48.4%), returning to the pattern of previous years (53.8% in 2015 and 50.5% in 2014).

In 2017, 56.9% of immigrants were male, an increase compared to 2015, when the share of male immigrants was 55.5%.

Emigrants and immigrants by age and sex, in 2015

Emigrants and immigrants by age and sex, in 2017

In 2018, the economically active population was of 9069 thousand persons (decreasing as compared to previous year), out of which 96.6% belonged to the working age group (15-64 years).

Economically active population

1) Provisional data.

Employment increased over recent years, reaching 8689 thousand persons in 2018 (as compared to 8671 thousand persons in 2017 and 8449 thousand persons in 2016). Among the employed persons in 2018, 56.9% were men.

Until 2002, most of employment was in rural area. Beginning with 2003, most of the employed persons had their permanent residence in urban area (54.9% in 2018). The category of employees prevails among employed persons (74.8% in 2018).

The unemployed number - according to the international definition (ILO) - in 2018 was 380 thousand persons, decreasing as compared to 2017 (-15.5%). Out of total unemployed, 26.6% were young persons (15-24 years).

¹⁾ Provisional data.

Source: Household Labour Force Survey (HLFS).

In 2018, as compared to 2017, the employment breakdown by activity sector of the national economy indicates a slight decrease in the number of those employed in public administration (-3.8%), financial intermediation (-3.7%) and arts, entertainment and recreation and construction (with -2.7% both). The activity branches where the number of employed persons increased are real estate activities (+12.3%), hotels and restaurants (+8.6%) and electricity production and supply (+6.2%).

Structure of employment in the private sector, by main activities of national economy

Note: The private sector includes private and co-operative or community ownership types.

¹⁾ Including electricity, gas, steam and air conditioning production and supply, and water supply, sewerage, waste management and decontamination activities.

²⁾ Provisional data.

Source: Household Labour Force Survey (HLFS).

The weight of employment in private sector fell during the last 5 years from 83.6% in 2014, to 83.2% in 2018. Out of total employment in private sector, 73.5% carried out their activities, in industry, construction and services, a higher percentage than the one of 2017, when it was 72.9%.

In 2017, the average number of employees was 4945.9 thousand persons. The average number of employees increased during 2017 with 186.5 thousand persons compared to the previous year.

Compared to 2016, significant increases in the average number of employees were recorded in the following economic activities: manufacturing, trade, health and social care, hotels and restaurants, information and communications, transport and storage, administrative and support activities, professional, scientific and technical activities, construction. At the other end of the range, the activities with decreases in the average number of employees were: mining and quarrying, production and supply of electricity and heat, gas, steam and air conditioning, financial intermediation and insurance and education.

The employees breakdown by economic sectors in 2017 shows that 61.7% were found in services (tertiary sector), increasing by 0.3 percentage points as compared to 2016, respectively by 0.8 percentage points as against 2015. 35.8% of total employees worked in the secondary sector (industry and construction), decreasing by 0.3 percentage points as compared to 2016, respectively by 0.8 percentage points as against 2015. The weight of employees working in agricultural branches (primary sector) remained constant in 2017 compared to the previous two years subject to analysis (2.5%).

The private sector absorbs most of the wage earners, so that in 2017 the weight of employees in the entirely private sector reached 72.2%, increasing as compared to 2016 by 0.5 percentage points.

Note: The series of data have been calculated according to the usually resident population, taking into account the usual residence criterion.

¹⁾ According to the international definition (ILO - International Labour Office).

²⁾ Provisional data.

Source: Household Labour Force Survey (HLFS).

The unemployment rate according to the international definition (ILO) - calculated as share of unemployed in the economically active population significantly fell during recent years, reaching 4.2% in 2018 (as compared to 4.9% in 2017 and 5.9% in 2016).

The ILO unemployment rate decreased in 2018 as against previous year for both women and men. Thus, the unemployment rate for women was 3.5%, decreasing by 0.5 percentage points as against 2017, while for men the unemployment rate was 4.7%, decreasing by 0.9 percentage points as compared to previous year.

In 2018, the unemployment rate was lower in urban than in rural area (3.8% as against 4.7%).

The young persons aged 15-24 years are the most severely affected by the unemployment phenomenon. Thus, in 2018, the youth unemployment rate was 16.2% (lower value than that recorded during 2014-2017), with quite significant differences by area (19.3% in urban as against 14.7% in rural area), The value of this indicator was 3.3% for those aged 25 years and over.

Note: Data calculated for the working age population (15 - 64 years).

The series of data have been calculated according to the usually resident population, taking into account the usual residence criterion.

1) Provisional data.

Source: Household Labour Force Survey (HLFS).

In 2018, the activity rate of working age population (15-64 years) was 67.8% (as compared to 67.3% in 2017) and recorded higher values for male population (76.9%, as against 58.3% for female population). By area, the indicator values were quite close: 68.4% in urban and 66.9% in rural area.

The employment rate of working age population (15-64 years) in 2018 was 64.8%, increasing as against previous year (63.9%).

In 2018, the employment rate for the population aged 20-64 years was 69.9%, increasing as compared to previous year (68.8%), a distance of 0.1 percentage points to the national target of 70% set out in the context of Europe 2020 Strategy.

The job vacancy rate is one of the indicators expressing the labour demand on the labour market. The average annual rate of job vacancies in 2017 was 1.24% registering the same values as the previous year, but decreasing by 0.82 percentage points compared to 2007, a year in which the job vacancy rate had the highest value).

Equivalent value of the consumption of agricultural products from own resources	10.7	9.3	8.3	6.4

¹⁾ Provisional data.

Source: Family Budgets Survey (FBS).

During 2015-2018, the main source of total household income formation was the money income, which increased from 87.9% in 2015, to 92.2% in 2018. During the same period, the income in kind had a downward trend, reaching 7.8% in 2018, mainly due to the equivalent value of the consumption of agro-food products from own resources (which experienced a decrease of 4.3 percentage points as compared to 2015).

Structure of money income, in 2018¹⁾ - total households -

¹⁾ Provisional data.

Source: Family Budgets Survey (FBS).

In 2018, salaries and other similar income represented the most important income category, with the highest share in the money income of households (72.9%), increasing by 5.2 percentage points as compared to 2017. A major share in the money income of households is that of social benefits (20.2%, a decrease of 3.8 percentage points as compared to 2017). On the contrary, the income from agriculture, the income from independent activities and the property income have a low share in the money income of households.

If the first decade of the last twenty years was characterised by economic instability, strongly influenced by the level and evolution of the inflation rate, the second decade was marked by the end of the transition to the market economy.

Thus, a reinvigoration of the real value of earnings started in 2000, with the level reached in 2007 exceeding by 11.8% the level of 1990, for the first time since 1990.

Motorcycles and mopeds	0.8	0.5	0.7	0.6
Cars	28.3	30.5	33.7	38.3

¹⁾ Provisional data.

Source: Family Budget Survey (FBS).

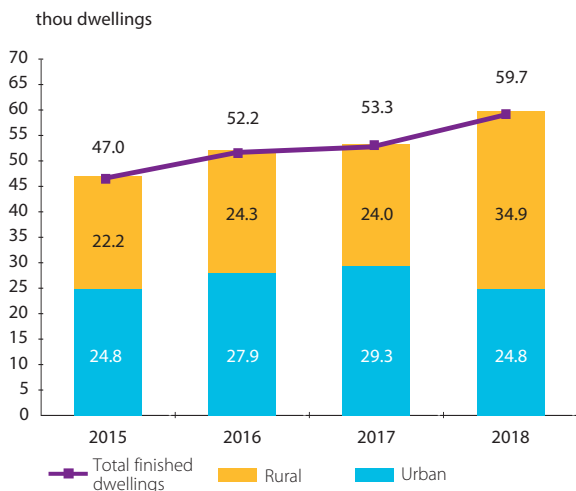

During 2015-2018, households' endowment with durable goods increased for most products. From 2015 to 2018, households' endowment with combined refrigerators - freezers increased by 20.9% due to a decrease in households endowment with refrigerators and freezers (by 6.4%). Likewise, an important increase compared to 2015 was registered for bicycles (by 35.3% respectively by 22.4), population endowment with TV sets increased by 12.0% and with vacuum cleaners and electric washing machines by 10.0% and 7.0% respectively. Households endowment with durable goods is influenced both by the financial resources of households and by the goods accumulated in the previous years, as well as by the range of goods on the market, goods that are increasingly high tech.

Evolution of the dwellings stock

	2015	2016	2017	2018

Note: Data on 2018 will be available in September 2019.

Source: Ministry of Labour and Social Justice.

Social assistance included social services and social assistance benefits. Their financing was, according to the law, from funds allocated from the state budget, local budgets, donations, sponsorships and other contributions of natural or legal persons, from the country and from abroad, contributions of beneficiaries, as well as other sources.

The Ministry of Labour and Social Justice is the central public authority which draws up the social assistance policy and promotes the rights of families, children, elderly persons, disabled persons and any other persons in need. In 2017, the amount spent from the state budget allocated to MLSJ for social assistance was 13465917.3 lei, by 15.1% more than in 2016 and by 35.0% more as compared to 2015. The increase was mostly due to the increased quantum of certain benefits: state allowance for children, allowance for family with children support, placement allowance, some benefits paid to disabled persons.

Within total expenses for social benefits and services performed through the budget of the Ministry of Labour and Social Justice, state allowances for children prevailed (35.5% in 2015, 37.7% in 2016 and 32.7% in 2017), followed by the children reading benefit (15.8% in 2015, 17.6% in 2016 and 25.3% in 2017).

The healthcare services in the health system¹⁾ were rendered through a network of sanitary units (hospitals and other sanitary units providing continuous hospitalisation and days-care services, polyclinics, health care centers, specialised ambulatories, dispensaries and other health care institutions) from both public and private sector.

In 2018, the network included 658 hospitals²⁾, 24 more than in 2017 and 52 more than in 2015. Out of them, 137 units provide only day hospital services and are mostly part of a network of private units under continuous development.

In 2018, the in-patients benefitted of 133070 hospital beds, 590 beds more than in 2017 and 921 more than in 2015.

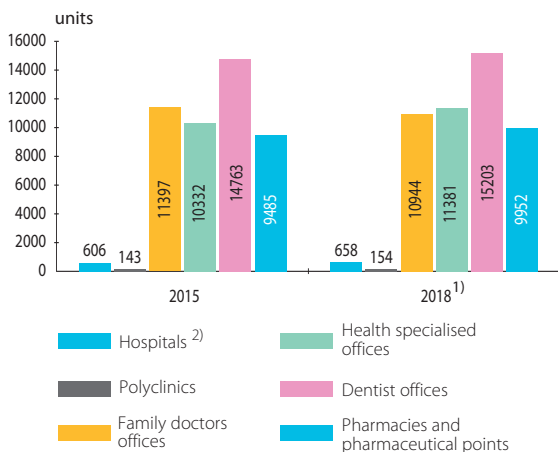

The year 2018, compared to 2017, saw both increases in the number of some healthcare units and decreases in the number of some others. In 2018, the number of independent specialist health care cabinets³⁾ (11381 cabinets) had the highest growth, with 302 units compared to 2017 and with 1049 units compared with 2015, while the number of specialised medical centres decreased with 22 units compared with 2017, but increased with 44 units compared with 2015.

1) Data on 2018 are provisional.

2) Including institutes, medical centres and clinics with hospital beds and other health care units providing continuous and daily hospitalisation services.

3) In the number of general practitioner offices, family doctors offices, dentist offices, health specialized offices are not included offices from other sanitary units structure, such as: polyclinics, medical civil societies, diagnosis and curative centers.

Source: NIS - The annual statistical survey "The activity of health care units".

The continuous development of the private health system has also led to an increase in the number of units in the pharmaceutical network and in the medical laboratories network. In 2018, 9952 pharmacies, pharmaceutical points and drugstores provided services, 252 units more than in 2017 and 467 more than in 2015.

The number of medical laboratories that operated in 2018 was of 4255 units, 178 more medical laboratories than in 2017 and 399 more than in 2015.

⁴⁾ Provisional data.

Source: Statistical survey on the activity of educational units.

The changes taking place in the educational field, in the last ten years, especially the new legal regulations in the educational field, as well as the restructuring of the national educational system have led to the reorganisation of the network of educational units in Romania.

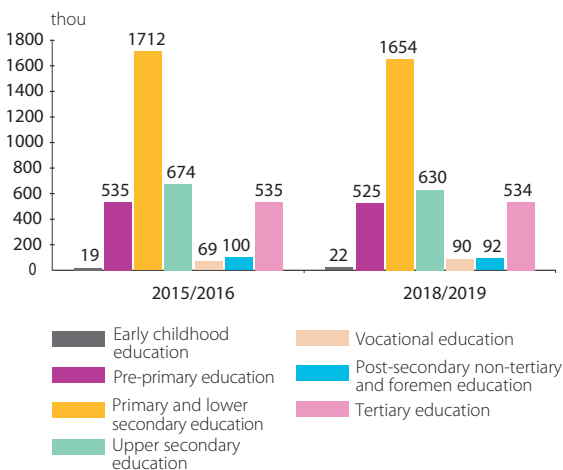

Thus, during the 2018/2019 academic year, the number of educational units decreased to 7020 units, 27 units less (by 0.4% less, respectively) as compared to the 2017/2018 academic year.

The configuration of the educational network has been correlated with the size of the school population and with the conditions offered by the existing material resources in order to ensure a high quality educational process.

The number of pupils attending pre-university education decreased, so that during the 2018/2019 school year their number was by 1.3% less than in the 2017/2018 school year. The data on school population enrolled in tertiary education also include, beside the students attending Bachelor's degree courses, the students who attend Master's and Doctoral degree courses, and those attending post-university and post-doctoral courses. Of the total students and trainees enrolled in tertiary education, 75.5% are students attending Bachelor's degree courses, 20.7% are students attending Master's degree and post-university courses, while the rest are students attending Doctoral degree courses as well as advances research post-doctoral programmes, 12.3% of the total number of students enrolled in tertiary education attend private education institutions.

During the 2018/2019 school year, for all educational levels, the enrolment rate of the school age population (0-23 years) had different values by sex (70.1% for boys, 73.9% for girls respectively).

School age population, by level of education

Students in tertiary education institutions, by fields of study in the academic year 2018/2019

ISCED-F¹⁾ Fields of education and training

¹⁾ISCED-F2013 (the International Standard Classification of Education, Fields of Education and Training) was adopted in **2014**, following the revision of ISCED-2011.

The structure of the students enrolled in tertiary education (bachelor's, master's and doctorate degree courses, post-university and advanced research post-doctoral programmes) in the 2018/2019 academic year by fields of education and training shows that most students and trainees study: business, administration and law (24.0%), engineering, manufacturing and construction (20.9%) and health and welfare (13.7%). In the private education sector, the highest share is that of the students and trainees who study business, administration and law (58.0%).

The number of graduates in the school year dropped compared to the previous year in post-secondary non-tertiary and foremen education (by 3.1%) and lower secondary education (by 3.2%). At the end of the school year 2017/2018, the highest number of graduates has been registered in lower secondary education (over 172 thou persons).

The number of tertiary education graduates (Bachelor's degrees, Master's degrees, post-university programmes, Doctoral degrees and post-doctoral programmes) in the academic year 2017/2018 was 126271 persons, increasing by 4.1% as compared to previous year.

The teaching staff in all educational levels did not experience significant changes in the last four years.

In 2018, the number of operational libraries (excluding branches) experienced a decrease of 115 units (1.2%) compared to 2017, respectively with 632 units (6.3%) compared to 2015. With regard to the ownership type, in 2018, the same with in previous years, most libraries are state units, 96.3% and privately owned libraries only account for 3.7%.

The number of active users in 2018 was 3132 thousands, decreasing with 116 thousands (3.6%) as against 2017 and with 448 thousands (12.5%) as against 2015.

The network of cinemas existing at the end of 2018 comprised 96 cinemas, 6 units more than in 2017 and 14 units more than in 2015. Compared to 2015, in 2018 the number of cinema performances increased by 137 thousand performances (28.1%), while the audience in cinemas decreased with about 1 million persons as against 2017.

In 2018, the number of performing arts and concert institutions and companies (theatres, performances or concerts companies and similar institutions, including their branches) amounted to 248 units, recording an increase of 18 units (7.8%) compared to 2017 and a decrease of 6 units (2.4%) compared to 2015.

The number of performing arts and concert (representations) held in 2018 amounted to 26 thousands, about 3 thousand more compared to 2017 and 3 thousands more than in 2015. The number of audiences registered by performing arts and concert companies and institutions was 8542 thousands in 2018, 2117 thousands (32.9%) more as compared to 2017 and with 47.1% (2735 thousands) compared to 2015.

c = Confidential data.

In 2018, the level of the gross domestic product, in nominal terms, was lei 944220.2 million, namely 48345.6 lei per inhabitant.

In 2018, as compared to 2017, the gross domestic product, in real terms, increased by 4.1% and the gross domestic product per inhabitant increased by 4.4%.

The evolution of the gross domestic product by activity sector had the following characteristics:

- services had the highest contribution to GDP formation, namely 57.1% of the total (lei 539182.4 million);
- industry, which contributed with 23.6% to GDP formation (lei 222414.5 million), was in second place;
- construction contributed with 5.4% to GDP formation (lei 51162.3 million);
- agriculture, forestry and fishing contributed with 4.3% to the GDP formation (lei 41014.3 million).

In 2018, the gross value added was lei 853773.5 million and represented 90.4% of the GDP.

2) Provisional data.

3) Exports - imports.

In 2018, in terms of GDP use, the actual final consumption was lei 746404.0 million and the value of its most important component - the actual individual final consumption of population households - was lei 651998.8 million.

In 2018, the amounts allocated for gross fixed capital formation totalised lei 200350.7 million.

The gross value added rate decreased in 2018, reaching 47.6%. 0.2 percentage points above the level of 2017 (47.8%).

The investment rate dropped last year, with the value of 23.5%, 1.3 percentage points below the level recorded previous year (24.8%).

Non-durable consumer goods industry	104.6	104.9	104.3	108.2
Energy industry	78.9	89.9	120.2	112.9

Note: Data resulting from infra-annual statistical surveys.

In 2018, the value index of turnover in industry increased by 11.8% as against the previous year, growth sustained by manufacturing (+12.0%) and by mining and quarrying (+5.9%).

In 2018 compared to 2017, the industrial production index (unadjusted series) increased by 3.5%, as consequence of the growth in manufacturing (+4.3%). Mining and quarrying decreased by 0.2%, while the production and supply of electricity and heat, gas, steam and air conditioning remained at the same level.

The main increases were recorded for the following activities: manufacture of machinery and equipment n.e.c. (+17.4%), manufacture of electrical equipment (+17.1%), manufacture of motor vehicles, trailers and semi-trailers (+13.5%), manufacture of other non-metallic mineral products (+7.7%), manufacture of basic pharmaceutical products and pharmaceutical preparations (+7.5%), manufacture of paper and cardboard (+4.8%), manufacture of rubber and plastics products and manufacture of beverages (4.0% each), manufacture of computers, electronic and optical products (+3.8%), manufacture of other transport equipment (+2.9%) and manufacture of chemical substances and products (+1.8%).

¹⁾ Provisional data.

²⁾ Data on the activity of national operators. For the **2015-2018** period only national passenger transport.

³⁾ Data excluding local public transport.

*) Under 0.5.

In 2018, compared to 2017, there were increases in the transported goods indicator for most of the modes, as follows: 7.9% for air transport (calculated based on 'tonnes'), 6.3% for sea transport, 4.8% for road transport and 2.3% for inland waterways transport (calculated based on 'thousand tonnes').

The railway transport and the transport by main oil pipelines marked decreases compared to the figures of the previous year, by 1.2% and by 1.4% respectively (calculated based on 'thousand tonnes').

As for the national and international passenger transport operations in 2018, compared to 2017, increases were noticed in the number of passengers for road transport by 11.0% (value calculated based on „thousands of passengers“) and for air transport by 7.9% (value calculated based on „passengers“). Railway transport marked a decrease by 3.7% (value calculated based on 'thousand passengers') as compared to the value recorded in the previous year.

¹⁾ Semi-final data.

²⁾ Provisional data.

The main structural changes in the evolution of exports by section of the Combined Nomenclature, in 2018 compared to 2017, consist of:

- increase in share for the sections: "Transport equipment and means" - by 0.8 percentage points, „Base metals and articles thereof" - by 0.4 percentage points;
- decrease in share for the section „Textiles and articles thereof" - by 0.5 percentage points.

In the evolution of imports by section of the Combined Nomenclature, in 2018 compared to 2017, the following structural changes have taken place:

- increase in share for the sections: "Mineral products" - by 1.0 percentage points "Transport equipment and means" - by 0.5 percentage points;
- decrease in share for the section: „Chemicals" - by 0.6 percentage points.

³⁾ Starting with 2016, the data are no longer comparable to previous years because reporting is done under the new Penal Code and other laws.

⁴⁾ To calculate the criminality rate for the 2015-2017 period, the usually resident population on July 1st of each year was used, population estimated under conditions of comparability with the final results of the Population and Housing Census 2011. In 2018, for criminality rate calculation the usually resident population on January 1st used, estimated under conditions of comparability with the final results of the Population and Housing Census 2011.

Source: Superior Council of Magistracy.

In 2018, in Romania there were 4563 judges, 84 less than previous year and decreasing with 59 judges as against 2015.

Of the total actions registered by the Courts of Justice in 2018 (1734 thousand cases), 1353 thousands (78.0%) were civil actions. The average number of penal and civil actions was 380 per judge in 2018, 112 actions less than in 2017, respectively 71 actions less than in 2015.

During 2015-2018, the number of definitively convicted persons per 100000 inhabitants decreased from 213 in 2015 to 163 in 2018.
